Telehealth/Telemedicine Consent
Last updated: 6 May 2025

By accessing, engaging and using this Telehealth/Telemedicine service and platform, I hereby voluntarily consent to receive remote healthcare services provided by qualified and licensed professional doctors from Alpro Clinic who are registered with Malaysia Medical Council (MMC). I understand that MiCare Sdn Bhd is not the healthcare provider but provides the technology platform that connects users to qualified doctors from Alpro Clinic.

I acknowledge and understand that the services provided on this platform may include the practice of healthcare delivery, information sharing, and transfer of other health related data using interactive technologies, including but not limited to text or picture messages, audio, video or other forms of digital communication in accordance with the Telemedicine Act 1997.

I fully understand there are potential risks with this technology and that this is not a substitute for in-person clinical consultation. I also understand that consultation, diagnosis of diseases/ailments and treatments cannot be performed via virtual consultation (text, audio, video or email) alone in view of its limitation. I may be advised to seek in-person medical attention if the attending medical provider deems it necessary based on the nature of my condition.

I understand that I have the right to withhold/withdraw consent at any time without (i) affecting my right to future care and/or treatment I am entitled to; or (ii) risking the loss of withdrawal of any program benefits to which I would otherwise be entitled

Re: Referral for further assessment
Patient Name: [Name]
Age: [Age]
Sex: [Sex]

For medical condition: [Condition]

Date: [Date]

I am referring to the above-named patient for in-person evaluation (as per clinic's request) and further review of recent medical condition.

The patient contacted a consultation via teleconsultation on 20/01/21, during which he reported the following symptoms:

- Recurrent episodes of moderate to severe headache, typically unilateral
- Associated symptoms (e.g., nausea, photophobia, phonophobia, etc.)
- Duration of episode (e.g., lasting 6-12 hours)
- Frequency (e.g., 3 times per month)
- Trigger factors noted (if any)

02 Outside of teleconsult operational hours

Daily (9.00 am - 10.00 pm)

Cut off time is at 5.00 pm for medication delivery

03 When MC is required

Medical certificates are issued at the doctor's clinical discretion

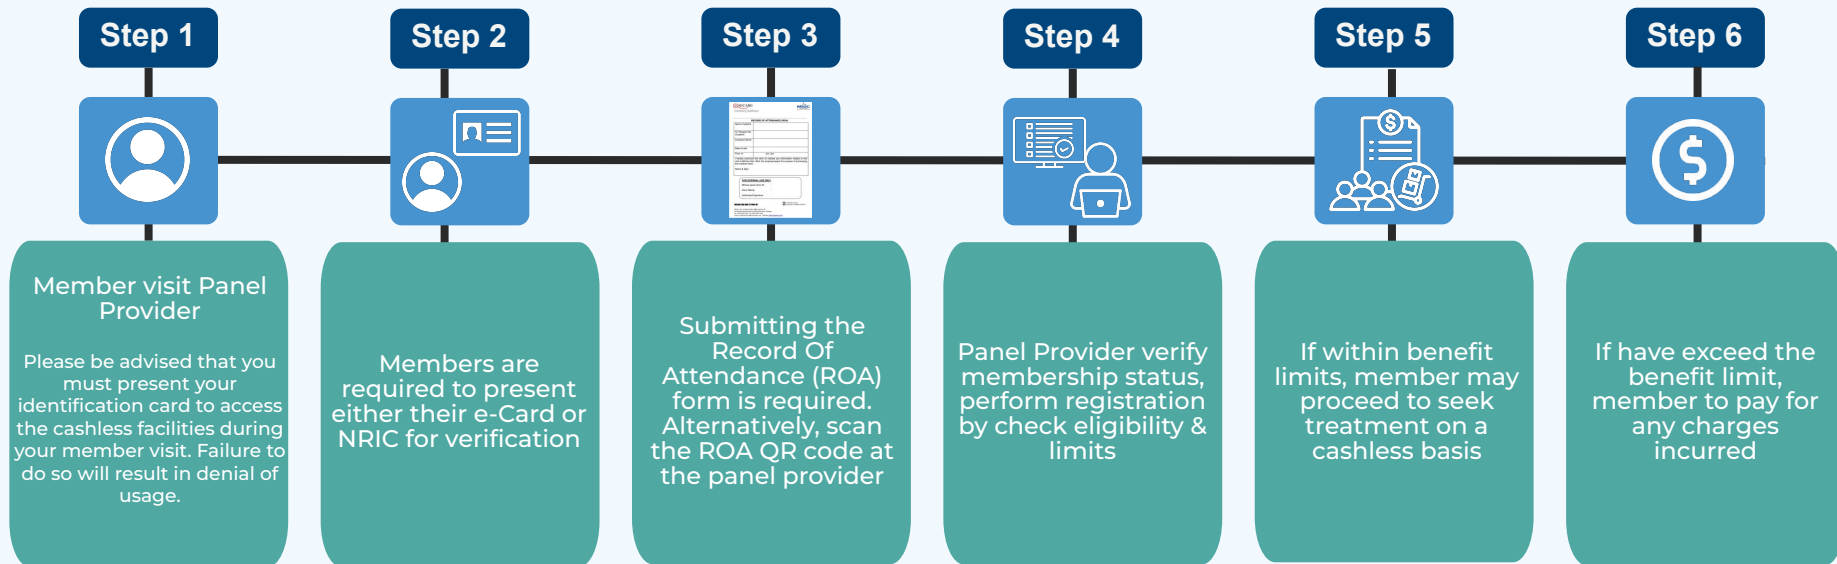

04 *Urgent Cases

**The list below is for reference only and not exhaustive. It includes common examples of urgent cases.*

- Fever >3 days or not improving
- Severe sore throat / difficulty swallowing
- Chest pain or tightness
- Shortness of breath
- Acute asthma attack
- Seizures
- Severe abdominal pain
- Injuries / bleeding / trauma

If symptoms are severe or worsening, seek immediate emergency care or visit the nearest hospital.
